

SCIENCE AND THEOLOGY SERIES

First Presbyterian Church of San Rafael will host a six-weeks series facilitated by Rev. Nancy Wiens on the dialogue between science and theology beginning February 6 at 7:30 pm. This Lenten Series, running through March 12, will include a 30 minute worship service with Eucharist beginning at 7:00 pm. Interested participants may join in at either 7:00 or 7:30.

While science and theology are often seen as opponents or separate domains, Wiens will explore how the two can positively influence each other. Topics will include divine action, physical cosmology, evolutionary biology and neuroscience in terms that work for both the scientist and the non-scientist. A curious mind and an open heart are all that is needed. For more information, 456-6760 or www.fpcsr.org.
